one topic mentioned in this message the pres leggs remarks are vague, non-committa and a conclusive. What he says about the tar If and incidentally about protection has the ambiger to of an interance of a pricates of Delphi Cool may read it for one nearling or another, which signal facility and success. It must be discussed in the cool of the cool cour seing to the democrat who has been insist-ing all these rears that the country should adop-ing all these rears that the country should adop-a by key of tree trade and that protection was the exerce of robbery, to be told in the first being pregared by a democratic president in both-five years that "the question of free trade" is no involved, nor is there now any occasion for the general thousaids of the wisdom or oxpeditions of the protective artem."

The is one side of the statement. But having

said to much for the protective system—having declared that its wisdom and expediency were decis-of markets whaten and expension were beyond discussion—the president wanted to say the party was been been as party and consequently the proceeded to say that "within the limitations remired for protection, certain reduelide should be made in our enstoms revenuck? Now when congress proceeds to act on this se greation, we shall find every protected in-terest making objections to the reduction. Every art of the country has some special thing now restocted; and any attempt to reduce the protection will be mut at once by the represen-tatives of the particular locality which produces that at icle. Each particular patterns will rise up to my that reduction of the duty will be ruinousit; it, and each will want the reduction to fail comewhere else. This has been tried again and again, and always with the same result. The outcome is always the formst on of a "pool" by representatives of all protected interests, and the consequent post- ponement of fariff reduction.

ponetient of term requeston.

This it comes about that such arguments as those, offered by the president always deteat themselves. If the expediency and wisdom of protection are conceded, by what argum every protected interest comes to the front with the statement that it will so rulned utterly if the processed reduction is carried out? We ought to have free sugar. But we do not get and shall not get it, become a sing is state, which pro-duces some sugar, objects. This is the most consideration, instance we have of the abuse of proticion; and yet even this is beyond remedy. The president ought to have particularized. He ought to have mentioned sugar, conspicuously. as the leading article which should be made free. But had be doneso, how Louisiana would protest and thuesten to break with the demo-

I RITISH POLITICS. Mr. Pernell will have a body of followers and

supporters in the new partiament who will be strong enough to constitute a real balance of power. The fact is giving rise to a great deal of ejeculation as to the future fourse of English politics. On the part of the managers of the main justice there is uncertainty what to do, attended by some signs of clarm. Among the monast mid conservatives there is constornation. Their shieude, by holding his force well in hand, it is feared, will be gille to make one parks or the chief take-up and measures as he may propose under sendity of defeat. Hence the London Times has been clamoring for a coalition of moderate alterals with the concernatives as a means of defeating Parnell's designs. It is now said the content of the conte on the one hand that the conservatives will abancem the effort to conclinate Parnell and try to effect an ellience as inged by the Times with the moderate liberals for the purpose of resis ug him; and on the other, it is and that Gladstone will make an effor to present a home-rule measure for I se and which will unite the Parnell man with he par y and enable him to out the conservatives from the government. It looks as it ome reorganization of parties in the United Kingcom, growing out of the present political Situation, were inevitated. Let the mass be to a gradefun extremely uncertain whether treland will get a local parliament. There is extreme fear hat, such parliament would make war on the control of th property in Ireland, a large part of which is held by non-res dente, and that various legal rights if property there, acquired by methods which will not now bear inquiry, and constituting, so he people of Ireland think, real abuses, would be attached and overthrown. This constitution, the property of the stacked and overthrown.

On Monesy the organization of the two house of congress was effected. A full account of the same was but ished by Tan OREGORIAN on Tuers by On Wednesday the bogus paper printed under "raised dates" part of the account hat had appeared in THE OREGORIAN of the day before. But this is its usual method of presenting "news." His pretense of giving a "sum-mar," of the president's message Wednesday was implerous. It contained no account of the death of Vanderbitt; failed to present the mes-sage of the governor of Washington territory; sage 6; the governor or wanington territory; had not high about the proceedings of concress on he preceding day, and in every respect was and in popular fraudulent and n.a. Its main resource for news is the evening papers, here and at San Francisco; and as they go to press by 4 o'click every lay, the reason why the bogus paper has not 'uil or late news is readily seen paper has not oil or late hows is readily In seeing itself up as a newspaper it is a sure as when a lauds him whose special o surt has when it lauds him whose sp as I, is a decent and honorable man.

The seloon keepers of Chicago have entered a vert it markab e protest aguitet a law recently engers it to compel drinking saloons to close their dotps in Sundry. They ile in that enforcement of the law will be a matter of great injustice and coderate to prove this by a table of statis-tics wilch slows that in 1884 there were 274,000 people in Chicago speaking English and American of acart ristics, and presumably in favor of Suidar observance. On it so that hand, there were: 14,000 Itlah, 210,000 Germans, 45,000 Schule für die vians, 24,000 Boltemines, 24,000 Peter, 8000 Flesch, 4000 Itulians, 3000 Africans, 24,000 Swetcs, 18,000 forwagians and 6,000 Dunes, and other miner nationalities, making a total of nearly 500,000 foreigners. It is claimed that a larger us tority of these foreigners are in fivor of open balrons and amusements Sundays. On this a cwing, lay demand that the matter rest till a papilic expression, and modification of the law san be secured.

Mary of our democratic brethren don't like It has message he "rentures to express the hope that we shall never again be remitted to the sessing the standard of the sessing the standard of the sessing the fact that service. We think it would not be difficult to find squae thousands of instant at purchase the president himself has distributed public positions? on this basis; but on the other hand it must be ulmitted that he has by he means made a "clean sweep," as he was expected to do. And because he has not, many members of his party don't like an administration I get talks for short of their expectations They speak of civil service reform as a thing haddlen "vistomary methods" and "Sunday scheo en iments," and any that if the presithey speak of civil service reform as a thing haddle on "visionary methods" and "Sunday rethods her iments," and say that if the president only give it up there will be nothing for him by 1888, when the party will rise in its might and 50 m for what has been pithing called the count averhoolization of politics."

It is supposed that both houses of congress will need Sensior Hoar's lift to provide for the presidential office, after the president and vice-president, on the secretary of state, and so on thirtyght he cabinet. This is better than the devolution of the office on the president of the capital and appears of the house, as 1900 prosenn a and apeaker of the house, as now prowith y law, since it will prevent sadden change of rall ical policy upon the death of the problem is and tice-president, and will take away the in becomen those offered to cranks like Guilean, to "remove" the president so as to get a

THE PINE CREEK ROAD.

The find appropriated by the legislature (\$15,000) to be expended in mitting a road into the Pine Creek mining district is now avaiable. The matter of means thus being settled, the matter of way is under discussion and, rulle matter of way is under discussion and, rulle maturally, is a question of important inspect in Union and Baker wunties. By the terms of the act, 4t is left with the cent of Duion county to decide from what particular point on Eag's creek the road shall start. Interested parties at creek the road shall start. Interested parties at Erker city desire, terminus as near that point as may be, and interested parties at Union want their town favred. It will be easy to accommodate both points fairly well and we doubt not the authoritative trib mail will not without prejadice. It was distinctly the wish and intent of the legislature to provide a road that would active feelilities to all parties and towns in the rest, and the court should remember this and

the claims of that city. Such delegates doubt not will be received cordially and their inpenis beeded as certainly they deserve to be.
The Baker City Democrate is unidous, for research that are entirely insturn and prophy, that
the actual work of building the road shall be done by eastern Oregon mer. It fears that a contract will be awarded to outside parties, who will do the work with Chimmer, instead of giving em-ployment to white then, who need work and are eight for it. It would, indeed, be urseanly for a public work of this kind to be performed. form public work of the same is no men and by Chinese, especially when white men and cilizens of the sints are ready to do it. Resides the main interest and considerat on in

this enterprise, there is an important general reason for wishing the road promptly and well built and the appropriation hodestly expended. In such works in years past there have been outrageous trauds, and there is a distinct suit-ment in the public mind that in the very nature of things, road schemes must be fractilent "jobe," Now if this Pine creek fund be housely and effectively expended it will cure the public mind of a distrust which stands in the way of public improvements of this kind. The way of public improvements of this kind. The state ought to aid the countles of eastern Oregon in brilding roads, which are easily needed in many districts. It ought to help the settlements in the interior of Columbia county to an ortile; if ought to put a good wagen read through to Thismook county, etc., and the success of the Pine creek road will have an important affect in

promoting these schemes.

Cartain ex-governors of the state are blamed, and very justly blamed too, for the roat frauds of past years. If they had trusted to nobody. but had gone in person to inspect the filleged 'results' of road work the frauds would never "results" of road work the frauds would never have been perpetrated. We truit that Governor Koody will bear his in mind and that he will keep vigilant watch upon the Pine crees work as it progresses, and that he will not accept and pay for it till he wonce it to be properly performed. His authority as the executive officer of the state gives I im absolute control over the commission with a right to write its contracts. commission with a right to veto its contrarects, and even to suspend its members from the post-tions assigned by he legislature. Let the gormor see that this encepties is carried out according to the intent of the legislature and in all respects "on the square," for he will be held accountable for it.

In his ennual report the secretary of war recommends, in concurrence with similar rec-ommendations by Generals Sheridan, Miles and others, that the various small military establishments scattered over the "frontier states and the interfee" be abandoned, and that the fixces of the army he concentrated at or near large dilies, from whence, upon occasion, they may be sent here or there, whenever their services may be needed. The secretary thinks that in the present condition of the country and the facilities for transportation from railread context in all directions, that the army will be more available. for immediate service than if scattered to many small stations. It was upon these considers tions that Gen. Miles acted a year ago in the at and onment of Fort Lapwal and other small establishments in this department, and concen-trated the bulk of the forces under his com-

It is reported that the republicans of the seament that is personally objectionable to a re-publican senator. It is difficult to believe that arything so fatures are this has been resolved. Such a course on the part of the republicans would at once unite and combine the de give them a cause to fight for, and afford them to be rejected, il should be for some public reason. It is not sufficient that the person ominated he objectionable to a republican sec atir. If the conditions were reversed—if the republicans had the president and the demo-drate the senate—what would the republicans

A second time the management of the county peor farm has been condemned by those appeinted by law to inspect it. Rad as the specific charges are, they fall short of the actual knuth—so we are told. It is hinted that the former report was smothered and the whole masser husbed up through the aid of an official who had husbed up through the aid of an official who had to the charge we have no knowledge, but we de know that it is time this matter was theror ghly and public y examined.

There is a proposition to change the name of the military station of Vancouver barranks, by making it a memorial to Gen. Wright or to some a negican soldier instead of perpetual ag the name of the foreign admiral Vancouver. There is a good point in this argument, but for all that we cannot think the proposition a good one. The name of Vançouver s no small part of the storical interest of the place, and we are quite sure that the people hereabouts would not willingly see it discarded.

It is said that J. H. M tchelliput out for Washington yesterday, bearing himself away, from Beaser, Carr, "Jock" Moses, "Joe" Gaston, "Gov." Daniels, and the other choice spirits by whom he is surrounded here. It is probable that he is gettin thard up, and finds it de-sirable to get into his seat, so that he may resome his old bus ness of extorting money and taking bribes as a senator.

If Gens. Beauregard and Early desiro their names to figure otherwise than itsers itably heresiter, they will get out of that destable Louisians.lottery business and seek some decent means of getting a liyelihood. They are mating the name of John Morgan, who was a professional gambler in Louisville before the war, respectable by comparison.

Revival of general basiness in eastern cities is indicated by activity at the hotels. The hotel business for the nonl. of November in New York city was bet or than during any previous month of which a record has been kept. The same report is made regarding the hotels of Cheago.

The proposed cresion to the Univer States of the proposed desired to the close shades of the corbin states of Mexico is not a desirable acquisition of territory. New Max co is a ready a so ree of amorainee to the federal authorities, and the increase of the federal domain in that quarter should be avoided.

Fame overtakes, the least ambit ous pl individuals sometimes. A son of the late Gen. Irwin McDowell, who publishes a viselty newspaper in San Francisco and a very weakly one al thal, is on trial in one of the courts in that

Josquin Miller is indignant over the execu-tion of Louis Riel and addises Americans to keep away from Canada. His incluence with the sloble army of poker-playing circles and spec-u ative bank cash ere will, we fear, he decidedly limited.

SULPHURETS TO DENVER.—Three car loads of suphurets from Afreworth's Gold Ridge mine on Burnt river, are being shipped to Denveyfor roduction. This is the first shipment of the kind from that section, but if the lot proves as tich as the supposed to be, it is not likely to be the last. There has great an out-of-all-busets in that seek the suphurent and when concentrators have been allowed to the state which will pay for shipment and when concentrators have been been will yield it large smount of wealth. FREHCHT IS—The week has been a verybusy one as regards arrivals and new bus ness. Arrivals were Prince Frederick, Katabalia, Northernbey, Viola, Horreby Castle, City of Glasgow, Inglewood, Chasca, Eaglan Castle, Singapore, Alumiha and Braiemar. Of these the last one only came under prior charten, the Singapore and Prince Frederick iseting business by late arrival. On Monday inte City of Canton sand on Wednesday the Ecraby Cistle were closed for wheat, the latter at 625 ad. To-day, the Alumina, Ragian Castle, City of Glasgow and Chasca accept grain business at rates withheld but well understood to be at 425 to 335 and 517 orders, all being from. The two wooden versels closed last week secured 375 cd, conditental options. The market is thus active, and other closings may soon be reported, for owners are climbing down from the dermand of 455 for roil. The increasing point is to two wood, three from and one composite. Sallings since last weekly report were Harry Morie. Parthia, Lord Kinnaird, Cristocale and Macdia mid, and one bark to-day, name not reported.

BETTERRE TONNAGE STATEMENT.

This will come forward in easy installments. The eastern section is now sending mire for San Francisco, shipment, several steamers, recently saided, giving more warehouse room. It is not easy to understand his movement. Obtainable prices strobaltyely higher noise than at San Francisco, and it has been tretty well understood that early contracts had been met. Holders will not sell here to say extend at less than \$1.20, although a few lots changed a mads at less, the cheapest being \$1.12\frac{1}{2}\frac{1}{2}\text{ Even this latter figure is above in parity with \$1.90 at San Francisco. During the week a large number of vessels came in seeking business, two or more having lost prior charters because of late arr val. The shipper's position is just now easier than it was a week ago, and it and large where sellers endowed any decided and vanjust now easier than it was a week ago, and it is hurd id, see where sellers endy any decided advantage. The quotation for Walta Walls remains at \$1.1661 174. The has de figure is almost unnecessary, as wheat calmot be secured for it, however much it hight represent the domestic shipping markst. With freight at 439 ed, the present ruling rate for United Kingdom business, more than that could be paid. The extreme move nearly rapresents the market. It would be gradily religiously distincted the control of the present of the financet. Many holders ask more and seem content to hold their produkt. This is his local situation. Lower prices will dome slowly in any event. Other markets have taken a downward turn and all point to a lower range before the month is over. English markets are suffering from the great lack of speculation. The British farmer is supplying one-third to one-half of the contribution of the month of the contribution of the great lack of speculation visible supply flaures continue a depressing influence. By the turn of the year the British farmer will have marketed the great built of his crep, and we shall have a better flees as to 4 coke. The American visible supply will increase for a nouth, or so yet. The quantity effort remains relate vel small. The Russian crop is officially g. sen as 205,000,000 busbels, the same as 1884 and 45,000,000 busbels leas than 1884. St. Petersburgillas, since May last, stapped four to five bhildrec thousand bushels weekly. Soon Guessa will be the only open Russian port. France and Gertramy buy spacingly of forden, wheat, for the week ending 2d inst. the Atlantic ports shipped 6,125,000 bu, wheat and 77,800 bhis floor. Between August 25 and November 25 the Atlantic ports shipped 6,125,000 bu, wheat 1,758 ou bbgs flour, and 10,208,000 but corn. Compared with a like time last year, wheat exports fell of 65 per cut, corn nearly doubling. The total falling away in forder shippents of wheat and wheat flour for theighter months being 13,611,000 as compared with the same months last year from Atlantic ports. The Minnespolis milles are now hock soot of infloading large holdings on the Chicago market with the intent of forcing down prices out west so that they may load upter with charp whoat. Every where the markets

FMRIGPTS—The week has been a very busy one is regardefartivals and new business. Arrivals were Prices Frederick, Katalidin, Northernber, John, Hor by Oashe, City of Glasgow, Inglewood. Raginn Castle, Singapore, Alumina and Of these the last one only The present spo; list is two wood, three iron discriid, and one bark to-day, REGISTERED TONNAGE STATEMENT.

WHEAT -Arrivals for the week were a total of WHEAT—Arryals for the wheck were a total of 1978 tons while y and 1970 tons Walls. Walla, a daily average of \$22% and 1974 respectively. As compared, with the previous week there has been a falling off of 2% tons valley and 305 tons Walla Walla. This lessening of recipits, particularly from the eastern section is due to causes already anticipated. A number of antipping points have torwarded the Julk demanding numerial temporing. Weaker thankets have she much to do with preventing continued free arrivals. Farmers have sold about all its. Interior warehouses still hold large ties hat are practically out of first hands. quantifice; has he prescically out of first hands. The eastern section forward in easy installments. The eastern section is now sending more for San Francisco shippers, several steamers; beconfly saidly lying in the warehouse room. It is not easy to understand this movement. Obtain also prices are relatively higher here than at San Francisco, and it has been britty well understood that early contracts and been met. Holders will not sell here to, any gracely a few lots changed hands at less, the cheapest between the first late. Even this latter forms is above a ing 51 los: Even this latter figure is above a parity with \$1 30 at San Francisco. During the antly with \$1 30 as san Francisco. During and speed a large purpler of vessels came in sooking assistents, when or more having lost prior charters because of almarrival. The shipper's position is ust now lession that it was a week ago, and it is ust now lession that it was a week ago, and it is ust now essire than it was a week ago, and this sard to see there relieve enjoy any decided advansee. The quotation for Walla Walla remains at in 1660 178. The inside figure is a most unnecessary, as wheat cannot be secured for it, however much it beight represent the demestic shipping market. market, Wira freighti at 438 ed, the present rating righ for United Kingdom business, more than that cruid be paid. The extreme move nearly represent to time implied. It would be readily paid but not readily accepted, demands as a rule being higher and resulting in a sort of deadlock. Valleytis quoised at \$125001 27%, with latest sales at the outside figure to both millers and shippers. Many bothers and more and seem content to held their product. This is the local attention. Lower prices will come slowly in any ovent. Other markets have taken a downward turn and all point to a lower rate to before the month is over. English markets have taken a downward turn and all point to a lower rate to before the month is over. English market as a suffering from the great lack of a peculation. The British farmer is supplying, oue-third to one-half of the consumptive demands. Liberal English stocks and American visible supply figures continue a degreesing influence. By the turn of the year the Editish farmer will have marketed the great bulk of his crop, and we shall have a better idea as to stocks. The American visible supply will increase for a month or so yet. The quantity affect remains relatively small. The linssian crop is officially a ven. as 265,00,000 bushels, the same as 1883 and 8,40,000 bushels less than 1884. St. officially i Iven as 208,000,000 bushels, the same 1883 and 48,500,000 hushels less than 1884. The merchandise arrivals are fall ug away steadily and visibly, but trade remains good, interior buyers taking more for the expected whater call. City trade loses none of its activity and the holiday isiness has so dom promised better. During the eek grocers have received additions to stocks of eastern case goods, arrivals of sugar, coffee, rice, salt, etc., teling on a lessened scale. Rail freights suffer mortly from this easmalled movement. Sevand regists and this ensuabed movement. Several days of rainy weather did not interfere with business.
